

## Portable Wastewater Recovery System Added to Puddle Vac Series

Capture and transfer up to 2000 gallons of water per hour with the compact RPT vacuum system. Features a powerful, industrial 2-stage vacuum motor. Heavy duty pump transfers wastewater up to 100' away while vacuuming continues...no need to stop and dump the collection tank. It is ideal for interior and exterior facilities maintenance contractors who need to collect wash water or for restoration contractors who need to pick up large volumes of water after a fire or flood. Protecting the environment from wash water runoff and complying with governmental storm drain regulations is simple, economical and effective with the RPT5E1.

**Requires:** 2" diameter vacuum hose, 3/4" to 1 1/2" transfer hose and 120v, 15amp wall outlet or 3500w generator

### Features...

- **30gpm pick up and transfer rate**
- **Dual Function, use as Wet or Dry vacuum:** The RPT comes with a debris catcher for the wet vacuum function or install the optional dry work filter for use as a high powered shop/detail vacuum.
- **Compact:** At only 3' tall and weighing less than 45 pounds, the RPT can be lifted easily with its carrying handle. Add an optional easy-roll wheel kit for enhanced portability (AHS04)

**Introductory List Price \$1295  
Model# RPT5E1**
